

Work Anywhere.
Stay Secure Everywhere.

Wiz-Knight is a portable encryptor that shields your computer from cyber threats on public Wi-Fi. It blocks cyber threats and uses advanced encryption to keep your private data safe anywhere.

WIZ-KNIGHT
PORTABLE ENCRYPTOR

PORTABLE ENCRYPTION PROTECTION

Protect your device and business data

ZERO TRUST SECURITY

Separate trusted and untrusted environments

SECURE REMOTE ACCESS

Work safely from anywhere in the world

PLUG & PROTECT

Simple protection without complexity

GLOBAL CONNECTIVITY

Stay connected securely anywhere

QUANTUM-READY SECURITY

Built to defend against future cyber threats

THE MODERN SECURITY CHALLENGE

Your employees work everywhere.
But threats follow them everywhere.

-  Public Wi-Fi attacks

 Unauthorized access
-  Device compromise

 Data theft & leakage
-  Data interception

 Future quantum threats

SECURE YOUR CONNECTION.
PROTECT YOUR BUSINESS.

One small device. A powerful shield for your data.

Book a Demo

Experience enterprise-grade protection anywhere you work.

BUILT FOR BUSINESS WITHOUT BOUNDARIES.

EXECUTIVES

- Business travel
- Confidential meetings
- Protection for sensitive information

REMOTE
WORKFORCE

- Work from anywhere
- Secure access to company resources
- Stay productive and protected

GOVERNMENT
& ENTERPRISE

- Protect classified data
- Enforce cybersecurity policy
- Meet compliance requirements

IT SECURITY
TEAMS

- Strengthen security posture
- Prevent data leakage
- Secure every connection, every time

QUANTUM-READY PROTECTION ARCHITECTURE

1 CHAIN OF TRUST FRAMEWORK
& HARDENED KERNEL

Prevents unauthorised code from running using secure boot and a locked-down operating system.

2 ISOLATION MODEL

Blocks threats from spreading by completely separating system processes and resources.

3 INFORMATION FLOW CONTROL

Enforces Zero Trust by strictly separating unencrypted data from encrypted data.

4 POST QUANTUM CRYPTOGRAPHY

Uses advanced ML-KEM encryption to protect data from future quantum computing threats.

5 HARDENED KEY EXCHANGE

Prevents device impersonation using secure key exchange and certificate-based authentication.

6 CRYPTO AGILITY

Allows cryptographic algorithms to be easily customised and adapted to different environments.

ENTERPRISE PROTECTION.
BUSINESS CONFIDENCE.

ENCRYPTED CONNECTION

End-to-end encrypted tunnel protects your data.

ZERO TRUST ACCESS

Verify before you connect. Always secure.

WORK ANYWHERE

Airport, hotel, office, or remote location — you're always protected.

PLUG & PROTECT

Simple deployment. No software installation.

QUANTUM-READY

Designed to defend against tomorrow's cyber threats.

ENTERPRISE-GRADE SECURITY YOU CAN TRUST

AES-256
ENCRYPTION

Military-grade protection

SECURE VPN
TUNNEL

End-to-end encrypted connection

ZERO TRUST
ACCESS

Verify before you connect

NO LOGS.
NO TRACKING.

Your privacy is our priority

MULTI-PLATFORM
SUPPORT

Windows | macOS | Linux

PORTABLE &
LIGHTWEIGHT

Carry it. Stay protected anywhere.

WIZ-KNIGHT
PORTABLE ENCRYPTOR

Independently Secure.
Always Protected.

ENTERPRISE SECURITY THAT
WORKS INDEPENDENTLY.

Wiz-Knight operates on its own.
No software installation. No dependencies.
Just enterprise-grade protection for your connections — anytime, anywhere.
